

Company Profile

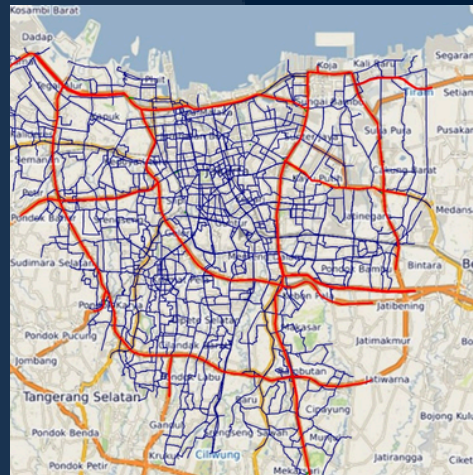

Navigating the Future of Sustainable Transport

PT Akasa Vidya Nusantara

ABOUT US

Transvire is a for-profit organization formally registered as **PT Akasa Vidya Nusantara**, focusing on **transportation studies** with **sustainable transportation principles** as its core foundation. We provide innovative solutions through **consulting, training, and data- and technology-driven research** to support efficient, environmentally friendly, and sustainable transportation systems.

Vision

To become a strategic partner in developing intelligent, efficient, environmentally friendly, and sustainable transportation systems in Indonesia and globally.

Mission

- 01** To deliver innovative solutions in transportation through consulting, training, and data- and technology-driven research.
- 02** To provide strategic consulting services in transportation policy, planning, design, and system evaluation through data- and technology-driven approaches.
- 03** To enhance professional competencies through modular and thematic training in sustainable transportation planning, design, and analysis.
- 04** To develop research and innovation based on data, technology, and policy to support the transformation of adaptive and impactful transportation systems.
- 05** To promote cross-sector integration through collaboration with government, academia, international partners, and transport-related professional communities.

Our Team
